Crown Recycle Bin Accredited “Designed for EMC” Leader in Enterprise Content Management Awards Crown Partners

DAYTON, Ohio – July 1, 2008 Crown Recycle Bin for EMC Documentum has been re-certified “Designed for EMC.” Recycle Bin is an object-level restore utility similar to the recycle bin feature for Microsoft Windows, built especially for the EMC Documentum platform. It prevents the potentially disastrous effects of accidental deletion by catching deleted objects before they are erased. Accidentally deleted content, including folders and metadata, can be easily restored to the content server. This makes Recycle Bin an essential part of any Records Management solution for EMC Documentum.

“Crown Recycle Bin is the original recycle bin utility for EMC Documentum,” said Crown Partners product manager Craig Treisch. “This is the third year of Recycle Bin’s DFE accreditation, re-affirming that it is a proven safety net for EMC Documentum customers,” he continued.

Crown Partners has seven DFE certified products, the most of any EMC Documentum partner. Crown’s commitment to the DFE program is just one element of a close partnership with EMC. The two companies continue to collaborate on development projects that will provide extended value for their customers’ EMC Documentum investment.

About Crown Partners: A leading provider of Enterprise Information Management (EIM) platform solutions, Crown Partners helps customers succeed by streamlining and simplifying information-intensive business processes.
